

SentiLAN™ Managed Service

**You're already producing the data.
Now it's time to use it to reduce your downtime.**

Your network is complicated, and with IIoT gaining momentum, it's not going to be getting simpler any time soon. Remote Monitoring Management with SentiLAN™ is your way of keeping an eye on your entire operation, so you're in control and on top of any challenges you may face, keeping production steady and predictable.

Key Features

- 24/7/365 Remote Monitoring Management platform, providing collection, monitoring and analysis of all networked data points.
- Real-time reporting, providing actionable insights for anyone who needs it.
- SentiLAN's flexibility allows us to mould around your operation, providing a tailored approach.
- Deployed, maintained and supported by our expert team of service engineers, whenever you need them.
- Geared and ready for monitoring your facilities' step up into Industry 4.0 & IIoT.
- Provides information that encourages preventative maintenance over costly downtime.

Exmos Managed Service

Ultimately, SentiLAN is about increasing your uptime. When we introduce SentiLAN to your network, we don't simply install and leave you to figure it out by yourself. SentiLAN comes as a complete Managed Service, with a team of expert engineers to take charge of monitoring, responding and alerting you when problems strike 24/7/365.

This is not just technology. By working with Exmos, you're bringing in knowledge and guidance that comes with 25 years of solid industry expertise.

Our Story

We've been providing technical guidance and support globally to Industry leaders for 25 years, and with that comes a wealth of knowledge and experience.

We're trusted by businesses with a combined turnover of more than \$8 billion, and we've deployed SentiLAN worldwide, monitoring thousands of data points every day, covering over 100 sites across 15 countries.

Get in touch to see how you can make SentiLAN work for you.

PAIN-FREE IT

Our Full Managed Service

- All setup, configuration and deployment of SentiLAN to all chosen devices.
- Full data availability audit to help identify data sources.
- 24/7/365 service desk support via phone & email, with expertly trained engineers.
- Ongoing review of data trends to identify potential efficiency improvements.
- Tailoring of SentiLAN around your specific operation to ensure best fit.

Key Technical Features

System Agnostic

Struggling with multiple monitoring options is a thing of the past: SentiLAN can monitor all networked machinery in a single platform.

Designed and Developed by us

We've used our 25 years experience to build SentiLAN and create a solution specifically for industry.

24/7/365 Monitoring

SentiLAN monitors your systems at all hours of the day, so we're keeping an eye on things at all times.

You choose what you need monitored

If you're producing data, we can collect and monitor it; be it power consumption, room temperature, SQL database growth, I/O collectors, backup success or machine performance.

Detailed monthly reporting

In addition to real-time alerts, monthly generated reports to help delve into your operations.

Real-time Data

Know exactly what's happening in your IT/OT network in real-time, rather than relying on historical information.

Operational Excellence

Detailed reports generated by SentiLAN will act as a powerful tool for Continuous Improvement officers to apply.

Effective SLAs

All SentiLAN support is backed by detailed and comprehensive SLAs.

And you're just getting started

This really is the tip of the iceberg in terms of what SentiLAN can do for your operations. We take a different approach to software development, truly putting you at the heart of SentiLAN's evolution. That way, you can trust that SentiLAN will give you the information you need to continually improve your production processes and keep you one step ahead of the competition.

Industry 4.0 is here today, and IIoT is the key to putting it all together. More devices, however, require more monitoring and produce a lot more data. It's inevitable your network will grow in the coming years, and the reality is that the growth will be significant. We're here to help you keep track of your network, and to provide you with actionable insights from your data.

We are already trusted by businesses with a combined turnover of more than \$8 billion. Get in touch today to discuss how you can put SentiLAN to work for you.

It's that simple.
